CLOUD COMPUTING - IT SUPPORT - SALES

WE HELP BUSINESSES EMPOWER THEIR EMPLOYEES

BY GIVING THEM THE FREEDOM TO CHOOSE WHERE AND HOW THEY WORK
SO THEY CAN ACHIEVE A MORE BALANCED AND PRODUCTIVE LIFE.

A Flexible, Secure, Standardised working environment that can be accessed from any location always giving your team the same work experience.

ADVANTAGES

VIRTUAL DESKTOPS

BENEFITS

- Give employees freedom to choose where to work.
- Build trust and loyalty with your team.
- More productive employees.
- Better work / life balance.

By moving your servers offsite to our private cloud we can increase the availability of your systems and reduce the maintenance required by your team. We can increase resources as needed on demand by your business.

ADVANTAGES

VIRTUAL SERVERS

BENEFITS

- Remove single points of failure.
- Only pay for the resources you need.
- No large expenses when growing your network and business.
- Reduce the costs of maintaining your IT infrastructure.

With our DR & Backup schedules built in automatically you can rest assured your servers and desktops are backed up and also replicated 24/7 to our DR datacentre in case of an emergency.

ADVANTAGES

DR & BACKUP

BENEFITS

- Keep your business online through a disaster.
- Minimise employee downtime.
- Protect your business and brands reputation.

BENEFITS

- Protect your business and brands reputation.
- Demonstrate to your clients you can be trusted with their data.
- Minimise business and employee downtime.

SECURITY SERVICES

With our range of cyber security measures we can protect your business from a wide array of ever changing and emerging threats.

ADVANTAGES

BENEFITS

- Minimise business and employee downtime.
- Employee/IT cohesion.
- Remove hurdles, improve productivity.

24/7 UK SERVICE DESK

We provide around the clock support for your business and its employees with our friendly team of IT Engineers who resolve issues quickly and make recommendations on how to prevent reoccurring issues.

ADVANTAGES

BENEFITS

- Build a relationship with someone you can trust to care for your needs.
- Grow your business with a trusted advisor who can support you on your journey.

PROACTIVE ACCOUNT MANAGEMENT

We provide you with a direct Account Manager who can assist with any queries. They will also speak with you regularly to assess your needs and provide reports while also proactively working to identify issues before they impact your business.

ADVANTAGES

BENEFITS

- No lost productivity.
- No business and employee downtime.
- No need to worry.

INTERNET LINES

We provide reliable connectivity your business can depend on which is monitored by our in-house engineers and comes with an SLA. We also provide backup lines which remove any single point of failure for mission critical applications.

ADVANTAGES

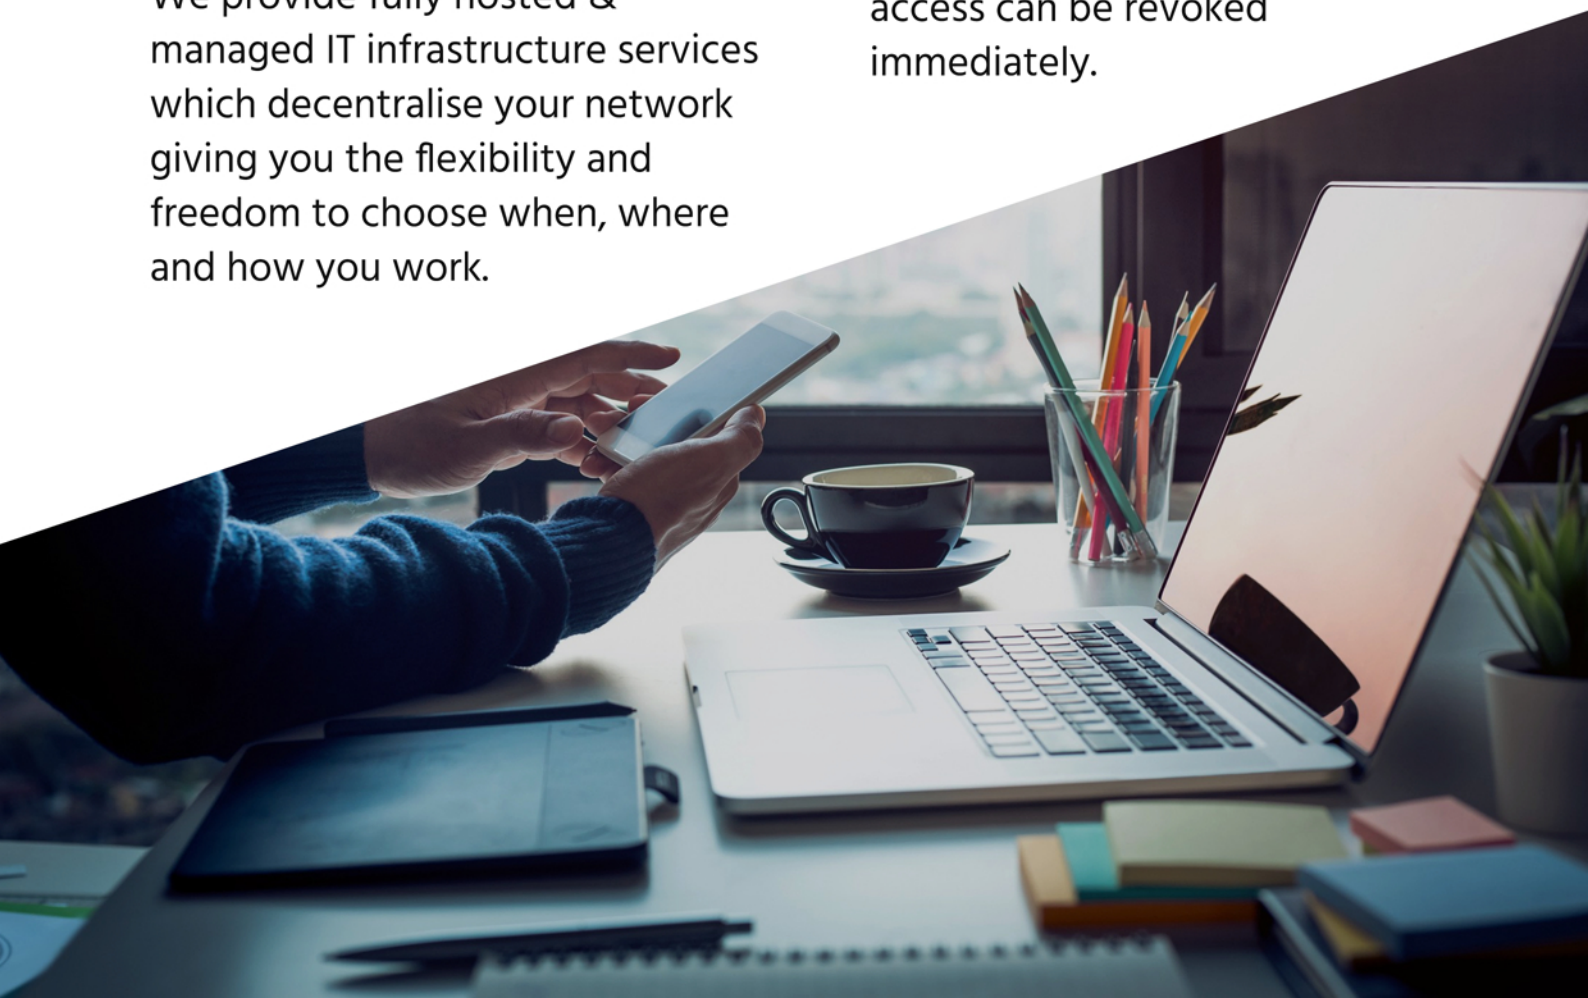

The world has changed and as a forward-thinking business you may be wondering if your IT needs to evolve and adapt to reunite your fragmented workforce.

At Commensus we help businesses empower their employees by giving them the freedom to choose where and how they work so that they can achieve a more balanced and productive life. This not only builds trust with your workforce but has also been shown to improve productivity and retain expertise.

We provide fully hosted & managed IT infrastructure services which decentralise your network giving you the flexibility and freedom to choose when, where and how you work.

With your IT network securely located and managed within our UK datacentres you are no longer tied geographically to any central office space. This gives you the freedom to choose short term, flexible office space for your team without long term commitments.

Security remains a major concern for remote teams and with our Virtual Desktops you retain full control of the user experience. Company data remains on the company owned Virtual Desktop thus ensuring you always have access to data stored on the desktop. If an employee leaves the data can be secured and access can be revoked immediately.

DR & Backup is built in. Any data on our desktops is automatically backed up.

We have two datacentres which replicate each other in real-time. Should disaster impact one site then you can continue to access your network.

We can also provide insights into employee behaviour such as browsing history, logon times & interaction levels. This helps you take responsibility for your employees' welfare and address any HR matters.

It's important your team are able to get quick, personal, friendly support when they need it to reduce downtime and reduce noise about IT issues.

With our UK based telephone and email helpdesk we are able to assist your employees with all their day to day issues.

Account Management is about giving you a friendly, reliable face to speak to when you need us most. We pride ourselves on building long-term trusting relationships with our clients.

You will have a named contact you can always speak to should you have any issues and regular review meetings to check the service is optimal.
